

QM-GBRG: Hybrid gloss silver back blackout film

Why just print on the same white material? This semi-rigid, bright white surface with a metallic background changes the whole game of unique advertising. Use it as you would with any display film and have your graphic stand out from all the rest.

Benefits:

- High Gloss White Face with Textured Silver Backside
- Scratch Resistant
- Semi-Rigid

Applications:

- Roll-up and Display Units
- Hanging Displays
- Poster POP & Holiday Advertising

Registered Latex Developer

This media is designed for digital printing applications using OEM printers with their accompanying OEM ink sets. Although designed for all printers using the aforementioned OEM matching ink sets; actual results may vary depending on printer model, age, print design, environmental conditions, and other factors. Exposure of a print to atmospheric pollutants, or to temperature, humidity, and / or lighting extremes can result in fading, color shifting, or other visual changes. The ideal conditions for printing and storage are a temperature of 70°F ±5°F and relative humidity of 50% RH ±3% RH. Our wide format media is guaranteed against manufacturing flaws and defects and is designed to resist printer jams when used properly.
