## QM-TRITEX7: Hybrid Banner for Latex

TRITEX7 is a very unique product. Slightly softer than polypropylene but with much more strength and durability, virtually tear-proof. Use this low cost solution for all of your banner needs. For best results, print with latex or UV platforms. If printing with dry toner printers you will need to manual cut.

### Benefits:

- Tear-proof
- Extremely Durable
- Wet Strength
- Ultra Smooth Surface

### Applications:

- 1 Year Indoor
- Hanging flags
- Posters
- Maps & Architectural Plans.

Registered Latex Developer

This media is designed for digital printing applications using OEM printers with their accompanying OEM ink sets. Although designed for all printers using the aforementioned OEM matching ink sets; actual results may vary depending on printer model, age, print design, environmental conditions, and other factors. Exposure of a print to atmospheric pollutants, or to temperature, humidity, and / or lighting extremes can result in fading, color shifting, or other visual changes. The ideal conditions for printing and storage are a temperature of 70°F ±5°F and relative humidity of 50% RH ±3% RH. Our wide format media is guaranteed against manufacturing flaws and defects and is designed to resist printer jams when used properly.
